LEADERSHIP

Fractional CTO & technical advisor
Team building (10-70 people)
Architecture & technical strategy
Cloud and datacenter migrations
Digital transformation & ERP rollout

AI & DATA

EU-sovereign RAG architecture
Multi-agent orchestration
Autonomous coding agents
Audio transcription pipelines
SQL, NoSQL, GraphQL
Data pipelines & warehousing

CLOUD & ENGINEERING

Google Cloud Platform, Terraform
Kubernetes, Docker, Linux
CI/CD (GitLab, GitHub)
Python, PHP, Bash, Flutter
Self-hosting (Caddy, Postgres)
Network & application security

CV · NOVEMBER 2026

Erik Ohlzon

Dad · Fractional CTO · AI Enthusiast · Athlete

Technology leader with 20+ years in tech. For the last 15 years I have built and led engineering teams in multiple sectors, including fintech/crypto, manufacturing and, more recently, InsurTech. I have taken legacy systems to the cloud with minimal downtime, and turned early prototypes into reliable production systems. Today I work as fractional CTO for a handful of product companies and build Teamet, an AI-assisted coaching platform based on coach-led, bounded AI and EU-sovereign infrastructure.

EXPERIENCE

Founder, Teamet
2024 - present

4ward Group AB · Sweden

- Founded and run teamet.ai, an AI-assisted coaching platform where the coach stays in control and the AI support is bounded.
- Architect EU-sovereign RAG over private coaching content, audio transcription and multi-agent orchestration.
- Design granular guardrails that define precisely what the AI may and may not say or do.
- Test extensively with evals, so every change to prompts, models and agents is measured before release.
- Run development with autonomous coding agents on GitLab CI/CD, as a solo technical founder.

Fractional CTO
Sep 2026 - present

Rideweather · Oddbrain AB · Sweden

- Provide technical leadership for the Rideweather product, covering architecture, cloud infrastructure and the mobile roadmap.
- Build the Google Cloud infrastructure as code with Terraform, including IAM and service account design.
- Release the app on both the Apple App Store and Google Play, and advise on Flutter mobile and voice companion features.
- Set up secure ways of working for agentic and human coding teams side by side.

Fractional CTO
2023 - present

ValueChecker · International Consumer Services Sweden AB · Stockholm

- Lead architecture and technical direction since moving from full-time to fractional CTO in 2023.
- Introduce agentic workflows into the engineering process.
- Lead the SOC 2 attestation and ISO 27001 certification efforts.

> **Full contact details:** use the contact form on 4ward.team to request a copy of this CV with Erik's full contact details.

PROFILE

Hands-on technical leader: comfortable at board level and in the terminal.

BASED IN

South Stockholm, Sweden

OPEN TO

Advisory, fractional and technical leadership roles.

EARLIER TECHNOLOGY

PHP, Laravel, Django, Falcon
openERP, Oracle, MySQL, MongoDB
Zigbee, GSM, IoT control platforms
OCR and translation tooling
Solidity / Ethereum (prototype)

CV · NOVEMBER 2026

EARLIER EXPERIENCE

Chief Technology Officer, full-time
2017 - 2023

International Consumer Services Sweden AB · alatest.com (until 2022) and valuechecker.ai · Stockholm

- Led design, development, deployment and operation of all software systems with a team of 10-15 engineers.
- Rebuilt the technical team four times (hiring, screening, onboarding) through high staff turnover.
- Migrated a live ecosystem of legacy microservices to the cloud with minimal downtime.
- Moved the entire corporate backend to a new datacenter while upgrading the OS on every bare-metal server.
- Led the Python 2 to 3 migration, introduced Kubernetes, and put GraphQL in front of the live API as a middleware layer with zero downtime.

Director of Operations
2015 - 2017

Soluxima Technologies Limited · Hong Kong · field operations in 19+ countries

- Coordinated field installers, project designers, support teams and the factory design labs (team of 35-70).
- Designed a program to retrofit existing field hardware with remote control and reporting, and began data collection for a global IoT control platform.
- Built a multilingual documentation and reporting platform that works offline and on mobile, and a technical reporting protocol used in the field.

Chief Information Officer
2012 - 2015

Soluxima Technologies Limited · Hong Kong

- Led the digitization of R&D and manufacturing, and moved all operations onto one organization-wide ERP.
- Built a small senior team that rolled out each division with a uniform method, and delivered custom ERP plugins for the business processes.
- Built customized OCR and translation tools to digitize paper-based records.

Chief Information Officer
2010 - 2012

TechammerAsia Co., Ltd · Bangkok and Singapore

- Solution architect and technical director for a team of 20-30.
- Delivered a customer satisfaction portal for DTAC, one of Thailand's top three mobile operators.
- Managed the company's exit from the Thai market in a favorable position for the shareholders.

EDUCATION

BSc, Information Technology
2001

National University of Science and Technology MISiS · Moscow, Russia

ADDITIONAL TECHNICAL HIGHLIGHTS

2018 Built an automated crypto trading platform on the Lightning Network.

2009 Prototyped a control PaaS for lighting and solar energy hardware over GSM and Zigbee.

2006 Contributed to the mailer backbone network and bare-metal infrastructure for an AOL advertising system.

2004 Contracted penetration tests against firewalls in the finance SME and online advertising sectors.
